

MARK ONE CONSISTENT POINT
AT TACK, THROAT, PEAK AND CLEW

Class Sails - four-sided sail measurement support

FOUR-SIDED SAIL WORKSHEET

CS-FS-01 - Page 2 of 2

Name	Email / phone	Order no.	Boat make / model	LOA	LOA unit	Date

Reference condition

Record whether values describe an existing sail or documented target dimensions. Use the same marked point at each corner for every adjoining measurement; if a bearing is uncertain, leave the affected value blank and identify it in Notes.

SAIL SPECIFICATION

Description

Measurement basis

Existing sail

Documented target

Sail type

Lug sail

Gaff sail

Sprit sail

Gunter

Features

☐ Battens

Notes

SAIL MEASUREMENTS (CM)

Lp

Luff: tack to throat

cm

Ld

Foot: tack to clew

cm

Lw

Leech: peak to clew

cm

Lg

Head: throat to peak

cm

D

Clew to throat diagonal

cm

Boundary check

All five dimensions use the same four marked corner points. Do not infer a point through obscuring hardware; leave the value blank and identify the uncertain bearing for Class Sails review.
